EDUCATION

Bachelor of Science in Computer Science

University of South Florida

Aug. 2025 – May 2028 (Expected)

Tampa, Florida

- GPA: 3.81
- Relevant Coursework: Linear Algebra, Vector Calculus, Programming Concepts, Probability and Statistics

TECHNICAL SKILLS

Languages: Python, SQL, LaTeX

Frameworks: PyTorch, PyTorch Geometric, scikit-learn, Streamlit, FastAPI

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code

Libraries: pandas, NumPy, Matplotlib, OpenCV, Pillow, NetworkX, Firebase

SELECTED PROJECTS

MIND: MRI-based Intelligent Neural Detection | *PyTorch, EfficientNet-B0, Streamlit* | [GitHub](#) | [Demo](#) | [Paper](#)

- Built and deployed a four-class brain MRI classifier for glioma, meningioma, no tumor, and pituitary tumor using an ImageNet-pretrained EfficientNet-B0 model in PyTorch.
- Fine-tuned the model on a public Kaggle MRI dataset using an 85/15 stratified train-validation split, achieving 99.52% best validation accuracy.
- Created a Streamlit demo for image upload, predicted class, confidence score, and per-class probability visualization to support model interpretability.
- Documented educational-use limitations and medical disclaimers to avoid clinical overclaiming in a biomedical AI setting.

Hypergraph-DDI | *Python, PyTorch, PyTorch Geometric, scikit-learn* | [GitHub](#) | [Paper](#)

- Built a solo exploratory PyTorch pipeline for comparing hypergraph neural networks with graph neural network baselines in drug-drug interaction modeling.
- Implemented HGNN, GCN, GAT, GraphSAGE, and MLP baselines with unified preprocessing, training, evaluation, and multi-seed reporting.
- Created a synthetic benchmark with 50 drug nodes, 80 hyperedges, 64-dimensional node features, 70/15/15 splits, and 1:1 negative sampling for pipeline validation.
- Documented results in a technical report, emphasizing synthetic benchmark limitations and future extensions to DrugBank/TWOSIDES and molecular feature representations.

AWARDS

National Champion (Vietnam) | *Bebras Computational Thinking Challenge (Senior Level)*

2024

2nd Prize | *Excellent Student - City Level - Mathematics (Grade 12)*

2025

1st Prize | *Excellent Student - City Level - Mathematics (Grade 9)*

2022

EXPERIENCE

Sales Support Intern

ASIA SOFTWARE DEVELOPMENT JOINT STOCK COMPANY

July 2024 – Aug. 2024

Ho Chi Minh City, Vietnam

- Supported sales planning and product sales activities in the industrial automation sector.
- Gained exposure to business operations, internal regulations, and sustainable energy solutions.

EXTRACURRICULAR ACTIVITIES

Co-Founder

TechCare Project

May 2024 – June 2025

Ho Chi Minh City, Vietnam

- Co-founded an educational initiative to improve computer literacy among disadvantaged children.
- Organized and taught “Hi Tech! Hello Future” classes for 30+ orphans over 6 months, translating technical concepts into accessible lessons.
